

Major Breakthrough In Fire Prevention Technology!

**“Now, get UL Class A
fire protection
for your wood deck—
in a bucket!”**

- Better, cheaper, faster, & safer
- Eliminate costly recover boards
- No need for time-consuming slip sheets

*Roller,
squeegee,
or sprayer
application*

Eliminate costly recover boards and slip sheets with FireOut™ Fire Barrier Coating!

FireOut™ Coating costs
as much as 43% less
to install than slip sheets
or gypsum boards!

FireOut™ Fire Barrier Coating is a low VOC, water-based coating system that provides outstanding flame spread and penetration protection to combustible roof decks in the event of fire.

- **Patent Pending Technology...**
Special intumescent additives minimize flame spread in the event of fire
- **Provides UL Class A Performance*...**
in mechanically attached and self-adhered TPO, PVC, and modified bitumen systems
- **Self Extinguishing...**
Active coating expands in the presence of heat or flame to form a protecting, self-extinguishing layer
- **Installs up to 130% Faster...**
Simple, one step application installs in less than half the time of a gypsum board or fire resistant slip sheet application
- **Up to 43% Lower Installed Cost...**
versus gypsum boards or multiple layers of slip sheets
- **Safer Installation ...**
Less material on the roof, no loose edges
- **Keeps the Roof Drier...**
seamless, breathable coating will not trap water if it rains before roof membrane installation
- **Easy Application...**
choose from spray, roller, or squeegee for maximum versatility
- **Stays Flat...**
fully bonded to the substrate, can't wrinkle, curl or lift
- **Lightweight...**
less than 10% of the weight of recover board

Specifications (nom.)

Application rate: 1.0 gal/100 ft² min.
Permeance: 7.8 perms
Color (wet/dry): pink/brick red
Unit sizes: 5 gal (11.9L) and 55 gal (208L)

*Refer to the current UL Roofing Material and Systems Directory for specific listings.
