**Green Attic
Ventilation**

*Help Protect Your Roof “24/7”
From Premature Deterioration With
A Dual Powered Green Machine™*

Exhaust Vent

Effective attic ventilation is critical for a long-lasting roof—yet most homes have insufficient attic ventilation!

A Dual Powered Roof Exhaust Vent will help to:

- Remove excess heat and moisture to protect your roof from premature deterioration
- Safeguard your attic possessions against mildew damage
- Limit the growth of harmful mold
- Protect your roof from premature deterioration and roof rot
- Minimize peeling and extend the life of exterior and interior paint
- Guard against ice damming in harsh winter climates
- Possibly reduce excessive heating and air conditioning costs

Master Flow® Green Machine™ Dual Powered Roof Exhaust Vents are a key part of the GAF-Elk Smart Choice® Roof System Solution, and have even earned the prestigious Good Housekeeping Seal (see reverse).

Hot, stale attic air is removed through the dual powered roof exhaust vents. Fresh air is drawn into your attic through your soffit (or other) intake vents.

Dual Powered **ECOSMART ROOF VENT**

Homeowner's Best Choice

- **24/7 Cooling...**It works whether the sun is out or not!
- **Uses 80% Less Electricity...**Versus a standard power attic ventilator*
- **No-Hassle Operation...**Automatically switches between solar power and house power
- **Thermostat Controlled...**For additional energy savings
- **Easy Replacement...**Uniform size makes it easy to swap out an existing vent
- **Excellent Warranty...**Standard 5 year Ltd. Warranty with 2 Year Labor Plus Protection**
- **Peace of Mind...**Backed by GAF-Elk, North America's Largest Roofing and Ventilation Manufacturer

*When running on house power.

**See limited warranty for complete coverage & restrictions.

"Also Available In Gable Mount!"

Professional's Best Choice

- **Maintenance Free Operation...**Equipped with a brushless motor that requires no maintenance, unlike traditional motor designs
- **Great Performance...**500 CFM for excellent airflow
- **Fully Adjustable Solar Panel...**Tilt and swivel design for optimal solar exposure
- **Homeowner Satisfaction...**Environmentally friendly operation
- **Excellent Protection...**Extra-wide flashing helps prevent leaks

Usage Recommendations

Total Attic Square Footage	Recommended # of Dual Powered Roof Exhaust Vents	Minimum Intake Ventilation (Net Free Area in Sq. In.)
1600	2	480
2400	3	720
3200	4	960

NOTE: The amount of exhaust ventilation should NEVER exceed the amount of soffit ventilation.
