Brighten your home with natural daylight.

SUN TUNNEL skylights bring in abundant daylight and all its related benefits. Daylight brings out the natural beauty of interior spaces in a way no other light source can. Colors become more vibrant and alive. Spaces become more inviting.

Not only that, but using daylight also reduces your HVAC load, which saves you money while contributing to a healthy environment.

Redecorate your home with daylight in as little as two hours. SUN TUNNEL™ skylight installation is quick and easy, making it a great do-it-yourself project.

And, if you want someone to handle the installation for you, refer to www.veluxusa.com for a listing of professional VELUX installers near you.

How to choose your SUN TUNNEL skylight

VELUX SUN TUNNEL skylights are perfect for any room where a view to the outside is not needed or where glass skylights are not an option such as:

- Hallways
- Closets
- Stairways
- Bathrooms
- Laundry rooms

There are many SUN TUNNEL skylight options available. Use the chart on this page or consult a professional to find the model that works best for your room.

Low profile metal flashing

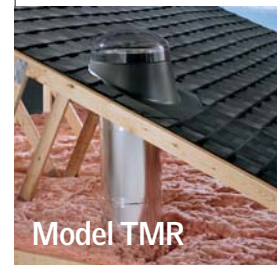

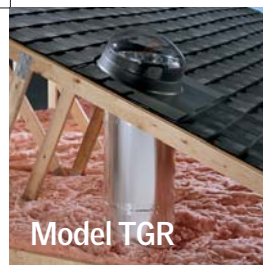

- Best for south facing roofs.
- Parallel to roof design blends to the roofline.

Pitched metal flashing

- Provides more even lighting throughout the day.
- Provides straighter tunnel run through many roof pitches.

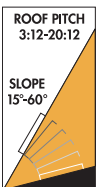

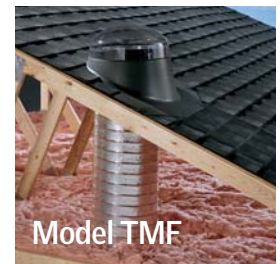

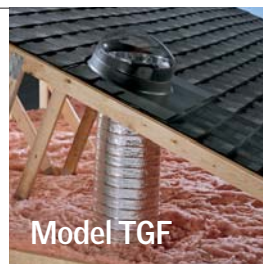

Rigid

- Brighter, whiter light.
- Excellent for long runs.
- Excellent for areas with less sunlight (north facing roofs).

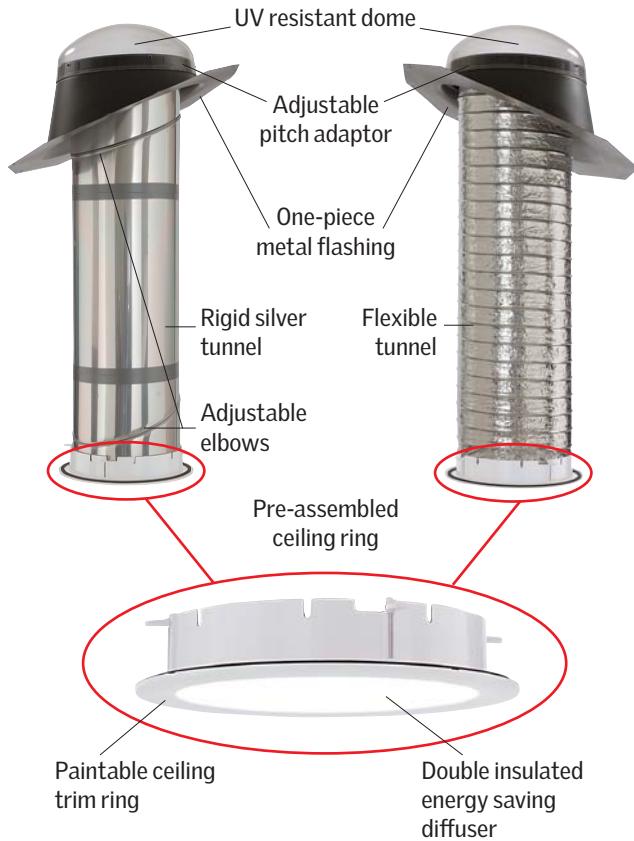

Flexible

- Excellent for ease and speed of install.
- Easily bends around attic obstructions.
- Great for sunny areas.

Flexible and rigid tunnel options

Superior weatherability

One-piece metal flashing

- Seamless design keeps out leaks.
- Corrosion resistant exterior withstands the elements over time.

Bright white light

Rigid silver tunnel

- Highly reflective mirror-like finish.
- Provides natural light versus yellow glow of incandescent bulbs.
- Silver material resists deterioration.

Easy and fast installation

Adjustable pitch adaptor (patent pending)

- Straight tunnel run from 3:12 to 8:12 roof pitches.
- Adjusts from the roof or in the home.

Flexible tunnel option

- Flexible design further simplifies installation.

Pre-assembled ceiling ring

- No drilling required.
- Easy tab-lock system ensures a tight fit.
